

## NetRex services up close

We pride ourselves on **quality hardware** and services that are practical and have **simple, user-friendly controls**.

### How the NetRex solution works

#### High quality cameras

Choose top IP cameras from the leading Swedish manufacturer Axis Communications. We have been using them for all our solutions for more than 16 years and they are very reliable.

#### Cloud platform

You can easily connect the cameras and any other network elements to a cloud-based platform that offers complete remote management and many other features.

#### Wide range of services

A range of practical services are available on the platform: surveillance with recording, retail analytics, time-lapse video, streaming, reading vehicle registration plates and more.

## What we provide for you:

#### The solution proposal

We will build a **solution that suits your needs** using the catalog of our services.

#### Installation and training

Our team will **install** everything for you and **explain** in detail how the system **works** and how to **operate it**.

#### Support

Our **helpdesk** will help you at any time. In most cases, we can solve the problem remotely without a technician having to come out.

## Who is NetRex?

We are a leading **IT company** offering **hosted video** services for **professional installations**. Since 2006, we have been continually exploring and discovering ways to **deploy modern network video technologies** with the ubiquitous internet. We strive to bring new ways to provide security, better control, and increase work efficiency.

We are a Czech company with a **presence and many installations in most European countries**. We have a **strong development team** and our close cooperation with the leading **IP camera** manufacturer, Swedish company **Axis Communications AB**, allows us to provide operational solutions to fulfill even the most demanding customer requirements. We believe that our services under the banner **"NetRex – Your Third Eye"** will appeal to you as well.

#### Certification & Membership:

## NetRex Box

Powerful local storage for recording archives with a lot of other advanced features.

Just do it smart!

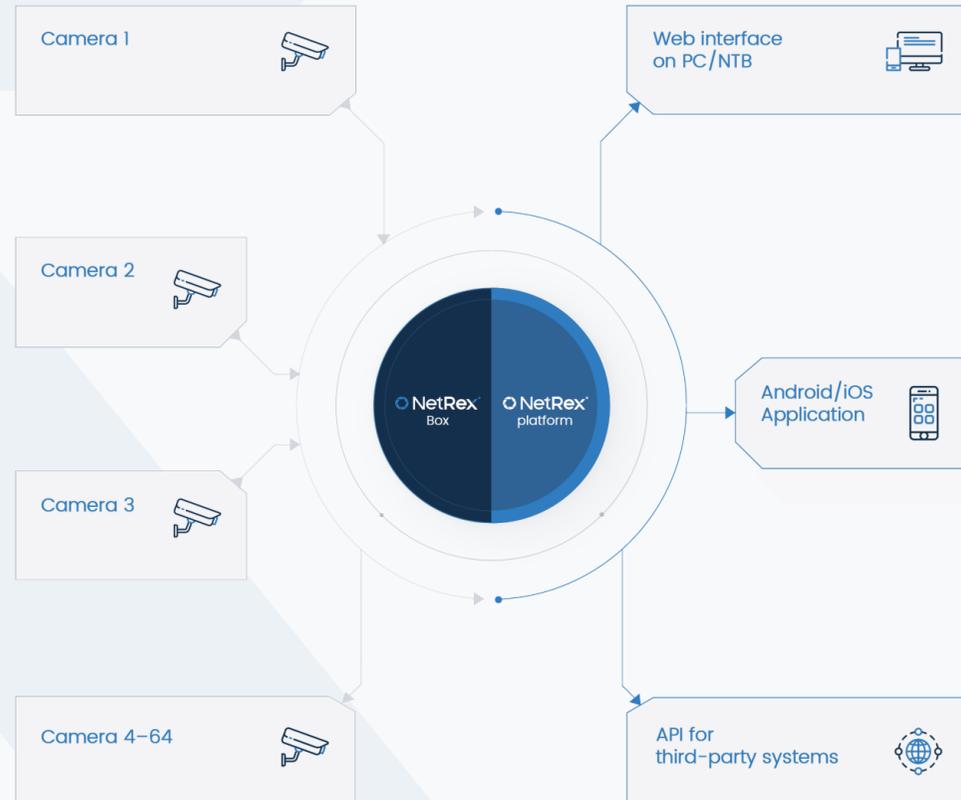

## Why NetRex Box and what allow you do to

### 01 Record – archive recordings from Axis IP cameras

- Do not allow you to miss something. The sophisticated and smart recording device NETREX BOX is designed to perfectly **complement your services from the Netrex platform**.
- Combination of quality local record and recording to Netrex platform in lower resolution is **the optimal solution** to ensure the integrity of image and audio data.
- Remote recording is suitable as a backup in theft or destroying the Netrex box, and the local record, on the other hand, ensures data even in the event of a failure of the Internet. **Rely on a powerful recording device!**

### 02 Archiving of recordings from IP cameras Axis

- **NetRex Box jis a local network storage with us developed and preset operating system with advanced functionality, which allows effective storage of records in the best possible quality.**

## Technical parametres of NetRex Box

NetRex Box	Rackmount
Price	NB4235 (6 TB) ..... 1450 € excl. VAT NB4335 (9 TB) ..... 1550 € excl. VAT NB4435 (12 TB) ..... 1650 € excl. VAT NB4635 (18 TB) ..... 1850 € excl. VAT NB4835 (24 TB) ..... 2050 € excl. VAT NB41235 (36 TB) ..... 2850 € excl. VAT
Maximum number of connected cameras	up to 64
Processor	Intel® Xeon® E-2314 (2,80 GHz)
Memory	8 GB (DDR4 3200 MHz)
Hard disks	4× SATA 6 Gb/s 5 400 ot./s
RAID	RAID 5
Available capacity	6 / 9 / 12 / 18 / 24 / 36 TB
Network card	Dual LAN 1 GbE + BMC
Data format	H.264
Continuous surveillance of device functionality 24/7	Yes
UPS support	Yes
Maximum consumption	80 W
Dimensions	437 (w) × 503 (h) × 43 (th.) mm
Weight	15,1 kg
Operating conditions	5 °C – 35 °C

The current parameters of the service are available at [www.netrex.cz](http://www.netrex.cz).

## Advantages of the NetRex Box

### 01 Easy and fast installation

Just plug the NetRex Box into the same network as the camera using an **Ethernet cable and turn it on**. You do not even need a public IP address. Forget a complex configuration; **it's easy and fast**.

### 02 Storage variability

The NetRex Box's local network video recorders have a **storage capacity of 6TB up to 36TB**. Select the storage size according to your needs and requirements!

### 03 Maximum performance

The NetRex Box has a powerful **quad-core Intel® processor** that, with a 64-bit architecture and a debugged operating system, can **easily record up to 64 cameras**. Take advantage of the maximum performance of the NetRex Box and don't let anything limit you.

### 04 Functional check

Leave the constant control to us. NetRex Box **communicates with the central platform** and notifies you immediately of any problems. **The service will notify you** by e-mail or push message of any shortcomings and problems. You no longer have to worry about something not working without your knowledge.

### 05 Maximum security

All recordings are in **maximum security**. In addition to local storage, recordings are also stored on backed up NetRex servers so that they are **always available** for your needs. Security is our priority. Rely on it!

### 06 Regular updates

The central NetRex platform provides a **remote upgrade of the NetRex Box**, which can be located anywhere. Leave the maintenance of your local repositories to us and always have **the latest software!**
